## INFORMATION BOOKLET 2020 – GRADE 000 & GRADE 0000

### WELCOME

The first few years of a child's life are the formative years of childhood.

They should be filled with love, play, fun and laughter. Nothing on earth is more precious than a smile on your little one's face. You'd give your child the world if you could, but a happy and secure homely environment, a teacher who enjoys giving her love and attention, consistent support by all our staff, a strong foundation, a well-rounded education and positive self-esteem are an excellent start. That's exactly what your little one will receive from us at LITTLE BEAN.

We understand the anxiety you feel about choosing the perfect childcare facility for your LITTLE BEAN. We also understand that you're wondering what your little one is doing while you are at work. We realize that you'd like to share in all their special moments. At LITTLE BEAN we make the most of every precious moment with your little one - all in a warm, nurturing and safe environment.

### ABOUT LITTLE BEAN

We focus on teaching skills, concepts and knowledge required for further learning. We offer a vibrant, loving and homely atmosphere where the children can acquire a love for learning that will sustain them throughout their school years. ## OUR CURRICULUM

### Language Arts

This core content learning area covers areas of linguistic development, comprehension skills and language. Little Bean has also developed a phonics program that includes a program from the UK called Letterland.

### Socio-Emotional

Social and emotional skills are crucial aspects of interpersonal development. We aim to harness individual characteristics while reinforcing positive actions that can improve confidence, leadership, team involvement and self-reflection. At Little Bean we have developed and embedded activities throughout its programs that prompt learners to interact, think and reflect with an objective of providing a well-rounded child that is fully prepared for life ahead.

### Numeracy

Numeracy incorporates sequential patterning, geometry, basic algebra and problem solving.

### Science

Ranging from mechanics and physics to biology and environmental science, our programs are packed with deeply enriching science experiments and inquiry-based activities.

### Creative Arts

What some children view as fun can be serious learning. We promote this through many avenues of art, from your fine arts (painting, coloring, molding) to music and role-playing. Creative Arts is the greatest area for children to start developing their imagination.

### Motor Skills

Motor skills are broken into two categories, fine and gross. Fine Motor Skills include cutting, finger painting, and hand control. Gross Motor Skills range from balancing to team play. Little Bean also believes that play-based activities are often the most exciting method in achieving a learning objective and is therefore among the most effective. We have incorporated play-based learning into all our programs.
